Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 48 - 55, drawn to a method of enhancing delivery of deoxyribonucleosides, classified in class 514, subclass 45.
- II. Claims 56 - 63, drawn to a method for treating or preventing radiation-induced cellular damage, classified in class 514, subclass 42.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are drawn to distinct methods of using the same composition(s). The method of enhancing delivery of deoxyribonucleosides as set forth in Group I would require a search divergent and broader in scope than the invention of Group II since the delivery may encompass a variety of vehicles and formulations and has no correlation to the treatment or prevention of radiation induced damage.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
